— Manusmṛti, 1.7. Excursus: Time and Cosmology (Chapter 7), Verse 1

## GURU'S INTERPRETATION

The Manusmṛiti whispers of cosmic cycles, painting a picture of the divine playing with creation and destruction, just as a child might build and dismantle sandcastles. These countless epochs, called manvantaras, represent vast stretches of time, each a complete cycle of creation, preservation, and dissolution. The "Parameṣthi," the Supreme Being, orchestrates this dance repeatedly, reminding us that change is the only constant, a rhythm woven into the very fabric of existence.

The text then speaks of the Krita Yuga, the age of truth, where dharma, righteous conduct, stands firm on all four legs. In this golden age, truth and virtue prevail so completely that no path to understanding requires battling against adharma, or unrighteousness. All pathways naturally lead towards goodness and ethical living.

How does this ancient wisdom resonate with you today? In our modern world, filled with rapid change and complex choices, the concept of cosmic cycles can offer solace. Just as the universe experiences phases of creation and destruction, so too do our lives. We face beginnings and endings, periods of growth and times of letting go. Recognizing this cyclical nature can help you navigate life's challenges with greater acceptance and resilience. The emphasis on dharma in the Krita Yuga serves as a guiding light, urging you to strive for truth and righteousness in your own actions and interactions. Even when surrounded by negativity or uncertainty, you can choose to embody the principles of dharma, creating a ripple effect of goodness in your own sphere of influence. Strive to be a beacon of light in a world that often feels chaotic.

## REFLECTION FOR TODAY

*In what small way can you embody the principles of dharma today, contributing to a more truthful and righteous world around you?*
